

YUVRAJ DHAKREY

Full Stack Developer

Ankleshwar, Gujarat | +9183-2026-0497 | yuvrajdhakrey8@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER SUMMARY:

Solution-oriented and problem solver with more than 3 years of experience building and maintaining software and software architecture. Highly skilled in communication, collaboration, and technical documentation.

WORK EXPERIENCE:

WebStrail Technologies

Full Stack Developer | 09 May, 2025 - Present

- From day one, I have been actively involved in live client projects, contributing to full-cycle web development.
- I have directly communicated with clients to gather requirements, provide updates, and ensure project alignment with expectations.
- Worked on a diverse range of projects, gaining hands-on experience with various tech stacks and solving unique development challenges.
- Involved in both frontend and backend development.
- Used modern tech stacks for scalable web solutions.

Zechrome Technologies

Web Developer | 16 August, 2023 - 15 March, 2025

- During my web development journey, I have developed and maintained scalable web applications using React.js and Node.js.
- Implemented third party libraries, also used various technologies like NextJs, Typescript, SCSS, Material UI(Styling components) and many other tools for enhancing development process.
- I have also worked on Nodejs, Expressjs, Mongodb for REST APIs in some project.
- Conducted code review and mentored my juniors to maintain best coding standards.

Rainbow IT services

Intern | June, 2022 - July, 2022

- Gained valuable experience in coding and building functional applications using HTML, CSS, JavaScript, and ReactJs.
- Demonstrated strong problem-solving skills, efficiently addressing challenges and optimizing application performance.

RELEVANT PROJECTS:

Trublu-PFH (Plan For Health) - Dental CRM

A membership-based dental CRM enabling practices to offer preventive care plans and automate billing

- Developed a membership-based dental CRM platform enabling practices to offer customized preventive care plans.
- Engineered secure payment automation modules for processing recurring monthly membership subscriptions.
- Integrated automated email communication and activity tracking systems to improve patient retention rates.
- Centralized patient enrollment workflows, increasing operational efficiency and predictable recurring revenue.
- Created configurable membership plan modules, enabling custom pricing and benefit tiers for practices.

Autharva

An agentic identity control plane for managing and securing enterprise non-human identities

- Integrated Calendly and email automation for seamless real-time appointment scheduling.
- Designed and structured the relational database from scratch to manage bookings.
- Created an automated CI/CD pipeline to streamline application testing and deployment.
- Deployed and hosted the web application securely on an AWS EC2 instance.

Fortune Management

CRM platform for internal operations of a leading healthcare consulting firm

- Working as lead engineer, responsible for both frontend and backend development.
- Built features to replace Excel-based workflows with a web-based application.
- Developed APIs using Node.js, Express, Mongoose, and MongoDB.
- Created PDF reports and invoices using PDFKit and PDFMake.
- Used Azure Blob Storage for file uploads and document storage.
- Built UI using React, TypeScript, MUI, Redux Toolkit, and Ag-Grid.
- Implemented form handling and validation using Formik and Yup.
- Created charts and reports using ApexCharts, HighCharts and Chart.js.
- Implemented role-based access control, and real-time data validation.
- Involved in direct communication with the client and handled ongoing feature development

Fundraising

Scalable fundraising and donation management platform for NGOs and organizations

- Built and scaled a fundraising platform enabling secure donations across NGOs, campaigns, and projects.
- Developed robust REST APIs using Node.js, Express.js, MongoDB, and Mongoose for complex data relationships.
- Created reusable React.js components for campaign listing, donation tracking, and user dashboards.
- Implemented JWT authentication and role-based access control (RBAC) for multi-role users.
- Used Azure Blob Storage for file uploads and document storage.
- Integrated AWS S3 for secure storage and delivery of media assets.
- Improved donation reliability and UX by handling edge cases like failed payments and duplicate submissions.

FlairX AI

Interview platform helping companies automate technical hiring

- Architected and developed backend for an AI-powered interview platform.
- Integrated Twilio for scheduling/interview communication via calls and SMS.
- Developed RESTful APIs using Node.js, Express.js, TypeORM, and PostgreSQL for robust data handling and role-based access.
- Scheduled background tasks like follow-up emails and data sync using node-schedule and cron jobs.
- Implemented secure auth using JWT and role-based access control
- Led backend team and maintained code quality with TypeScript and Joi validations.

Rehq

Property Dealings and management Application

- Established the entire project architecture, implementing best practices and design patterns for scalability.
- Implement Calling and emails sending functionality using Twilio Sdk.
- Socket.IO for real time communication
- Designed and implemented the backend infrastructure, leveraging Node.js and Express.js for server-side logic and MongoDB for efficient data storage and retrieval.

Aura Chat App

Real-Time Chatting Platform

- Built a full-stack chat app with ShadCN components and Lucide-powered animations.
- Implemented login/signup authentication and user profile management.
- Enabled real-time messaging using Socket.io and Zustand for state management.
- Supported single/group chats, image, and file sharing.
- Tech stack: React.js, Node.js, MongoDB, Zustand, ShadCN, Socket.io.

EDUCATION:

2019 - 2023 | Government Enginnering College | 7.3 CGPA

Bachelor of Engineering - Electronics and Communication

SKILLS:

- **Frontend:** React.js, Next.js, MUI, SASS, HTML, CSS, JavaScript, TypeScript, Tailwind.
 - **Backend:** Node.js, Express.js, MongoDB, TypeORM, Postgresql, SendGrid.
 - **Tools & Others:** Git, GitHub, Postman, Redux, Zustand, Socket.IO, ShadCN
 - **Cloud & Deployment:** AWS, S3, Azure, Vercel, Netlify.
-
